

How to Access Remote resources from an Apple Mac

Before you start please download “Microsoft Remote Desktop” from the app store, it is free so if you see any cost linked with it then it is the wrong one.

Once you have installed it click open or open the app from the launch pad

Once it is open you will be presented with the following screen

Select Remote resources button, you will see the following screen

A screenshot of a dialog box titled "Remote Resources". The dialog has a standard macOS-style title bar with red, yellow, and grey window control buttons. The main area contains three input fields: "URL" with the value "https://contoso.com/RDWeb/Feed/webfeed.aspx", "User name" with the value "Domain\user", and "Password" which is currently empty. Below these fields is a "Refresh" button.

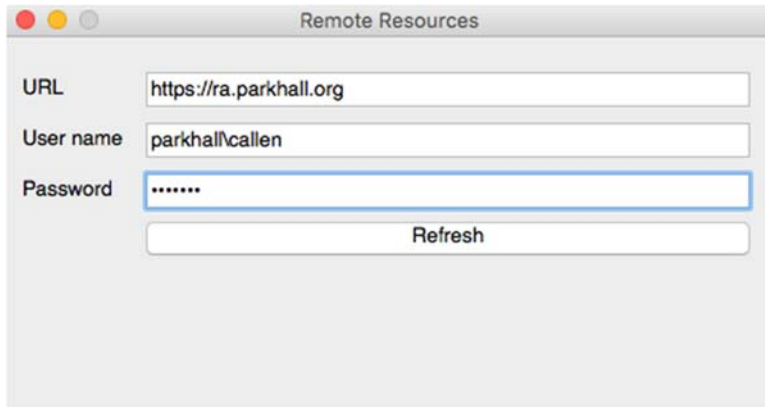

You will need to enter the following information

URL = <https://ra.parkhall.org>

Username = **parkhall\your username**

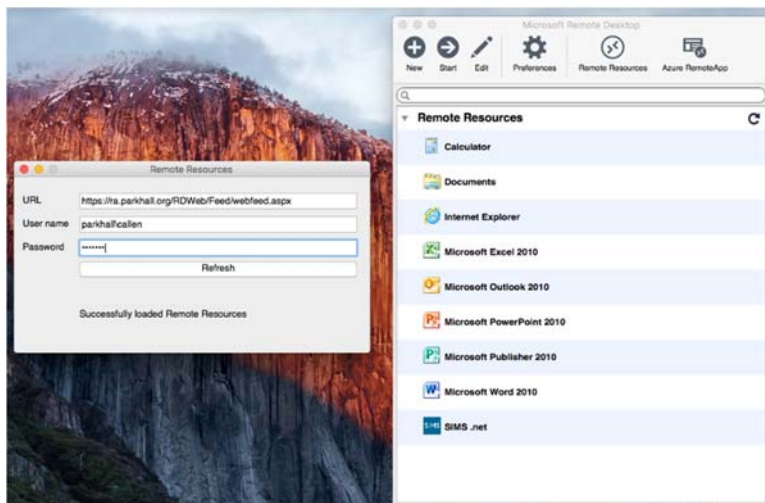

Password = **your school system password**

Once you have done this you should see a screen like this

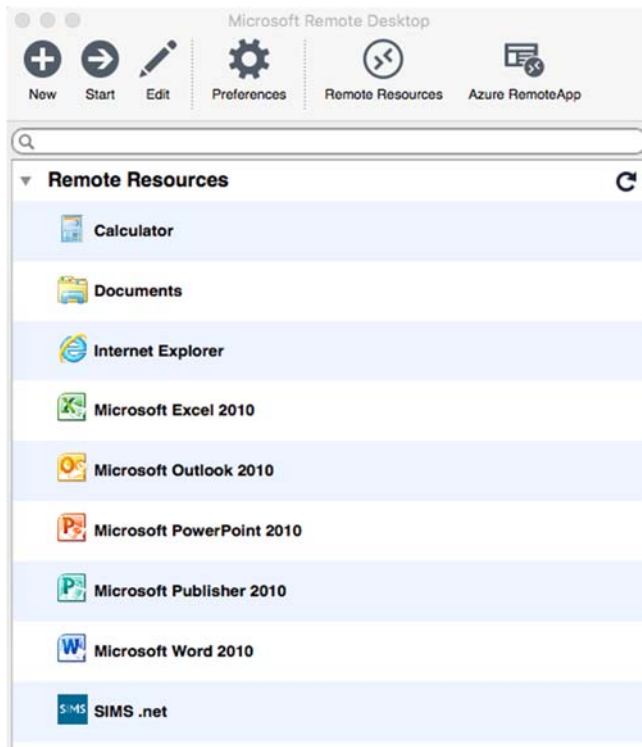

Now click refresh, additional information will be entered into the URL box.

At the same time you should now see the programs you have access to from the remote desktop app

You can now close the remote resource screen this will leave you with the following screen open

To access the program(s) you need, just double click on the program.
